Managing remote, unmanned and unprotected sites is less problematic with remote monitoring and control solutions from Advantech B&B. Simultaneous management of multiple sites can be done from a central location or via web connection anywhere a supervisor happens to be. Improve efficiency and reduce costs of site maintenance visits by diagnosing the problem before dispatching a technician to troubleshoot.

- Monitor temperature, level, flow, and more
- Status alerts via computer, smart phone, fax
- Control automatically or by remote command
- Conduct historical analysis of collected data
- Remote video security

Rugged, reliable and intelligent connectivity solutions from Advantech B&B are at the heart of a growing number of remote monitoring and control applications. Advantech B&B solutions provide flexibility and scalability as needs grow and change.
